DETAILED ACTION

Election/Restrictions

Claims 43 and 44 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 11/7/08.

The traversal is on the ground(s) that it would not be an undue burden to examine all claims. This is not found persuasive because the inventions are parts of separate classification (Invention I 385/8; Invention II 438/31) and separate status in the art (product and method of making a product) and a different field of search because of the separate classification and separate category of invention, resulting in an undue burden.

The requirement is still deemed proper and is therefore made FINAL.

Drawings

Figures 8 and 9 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g).

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 26.

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: 4, 101, 103, 105, 106, 107, 108, 109, 111, 114, 115, 220, 222, 232.

Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

Claims 31 and 35 are objected to because of the following informalities:

In claim 31, please replace "as" with "and" in the phrase, "on a substrate as arranged in a plane of the substrate."

In claim 35, please add "an" after "as" in the phrase, "the transmission line as electrical signal."

Appropriate correction is required.

Allowable Subject Matter

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

Claims 31-42 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

With regard to claim 31: This claim is allowable over the prior art of record because the latter, either alone or in combination, does not disclose nor render obvious an electromagnetic wave generating device for generating a wave having a frequency ranging from 30 GHz to 30 THz including a laser device, an optical waveguide, a photoconductive switch for converting a laser beam in the waveguide to the electromagnetic wave, a transmission line for propagating the electromagnetic wave, first and second electrodes on an upper surface of the switch such that a gap is formed between the electrodes at an end of an upper surface of a substrate and wherein the laser beam is propagated through the waveguide irradiates a lateral surface of the switch at a portion corresponding to the gap, in combination with the rest of the claimed limitations.

With regard to claims 32-42: These claims are allowable over the prior art of record because they depend from an allowable claim.
